

## C# Exercise 1 – Check Installation and Setup

1. Complete the download and installation of Visual Studio
2. Create your first “Hello World” program
3. Run the program and check the phrase “Hello World!” is output in the console

### Bonus:

4. Edit the code by adding multiple print statements to output different phrases other than “Hello World”, e.g. “My name is Simon” or “Today is Friday 13<sup>th</sup> December”
5. Rerun the code to see the changes in action
